# Engineering Excellence Shaping the Future

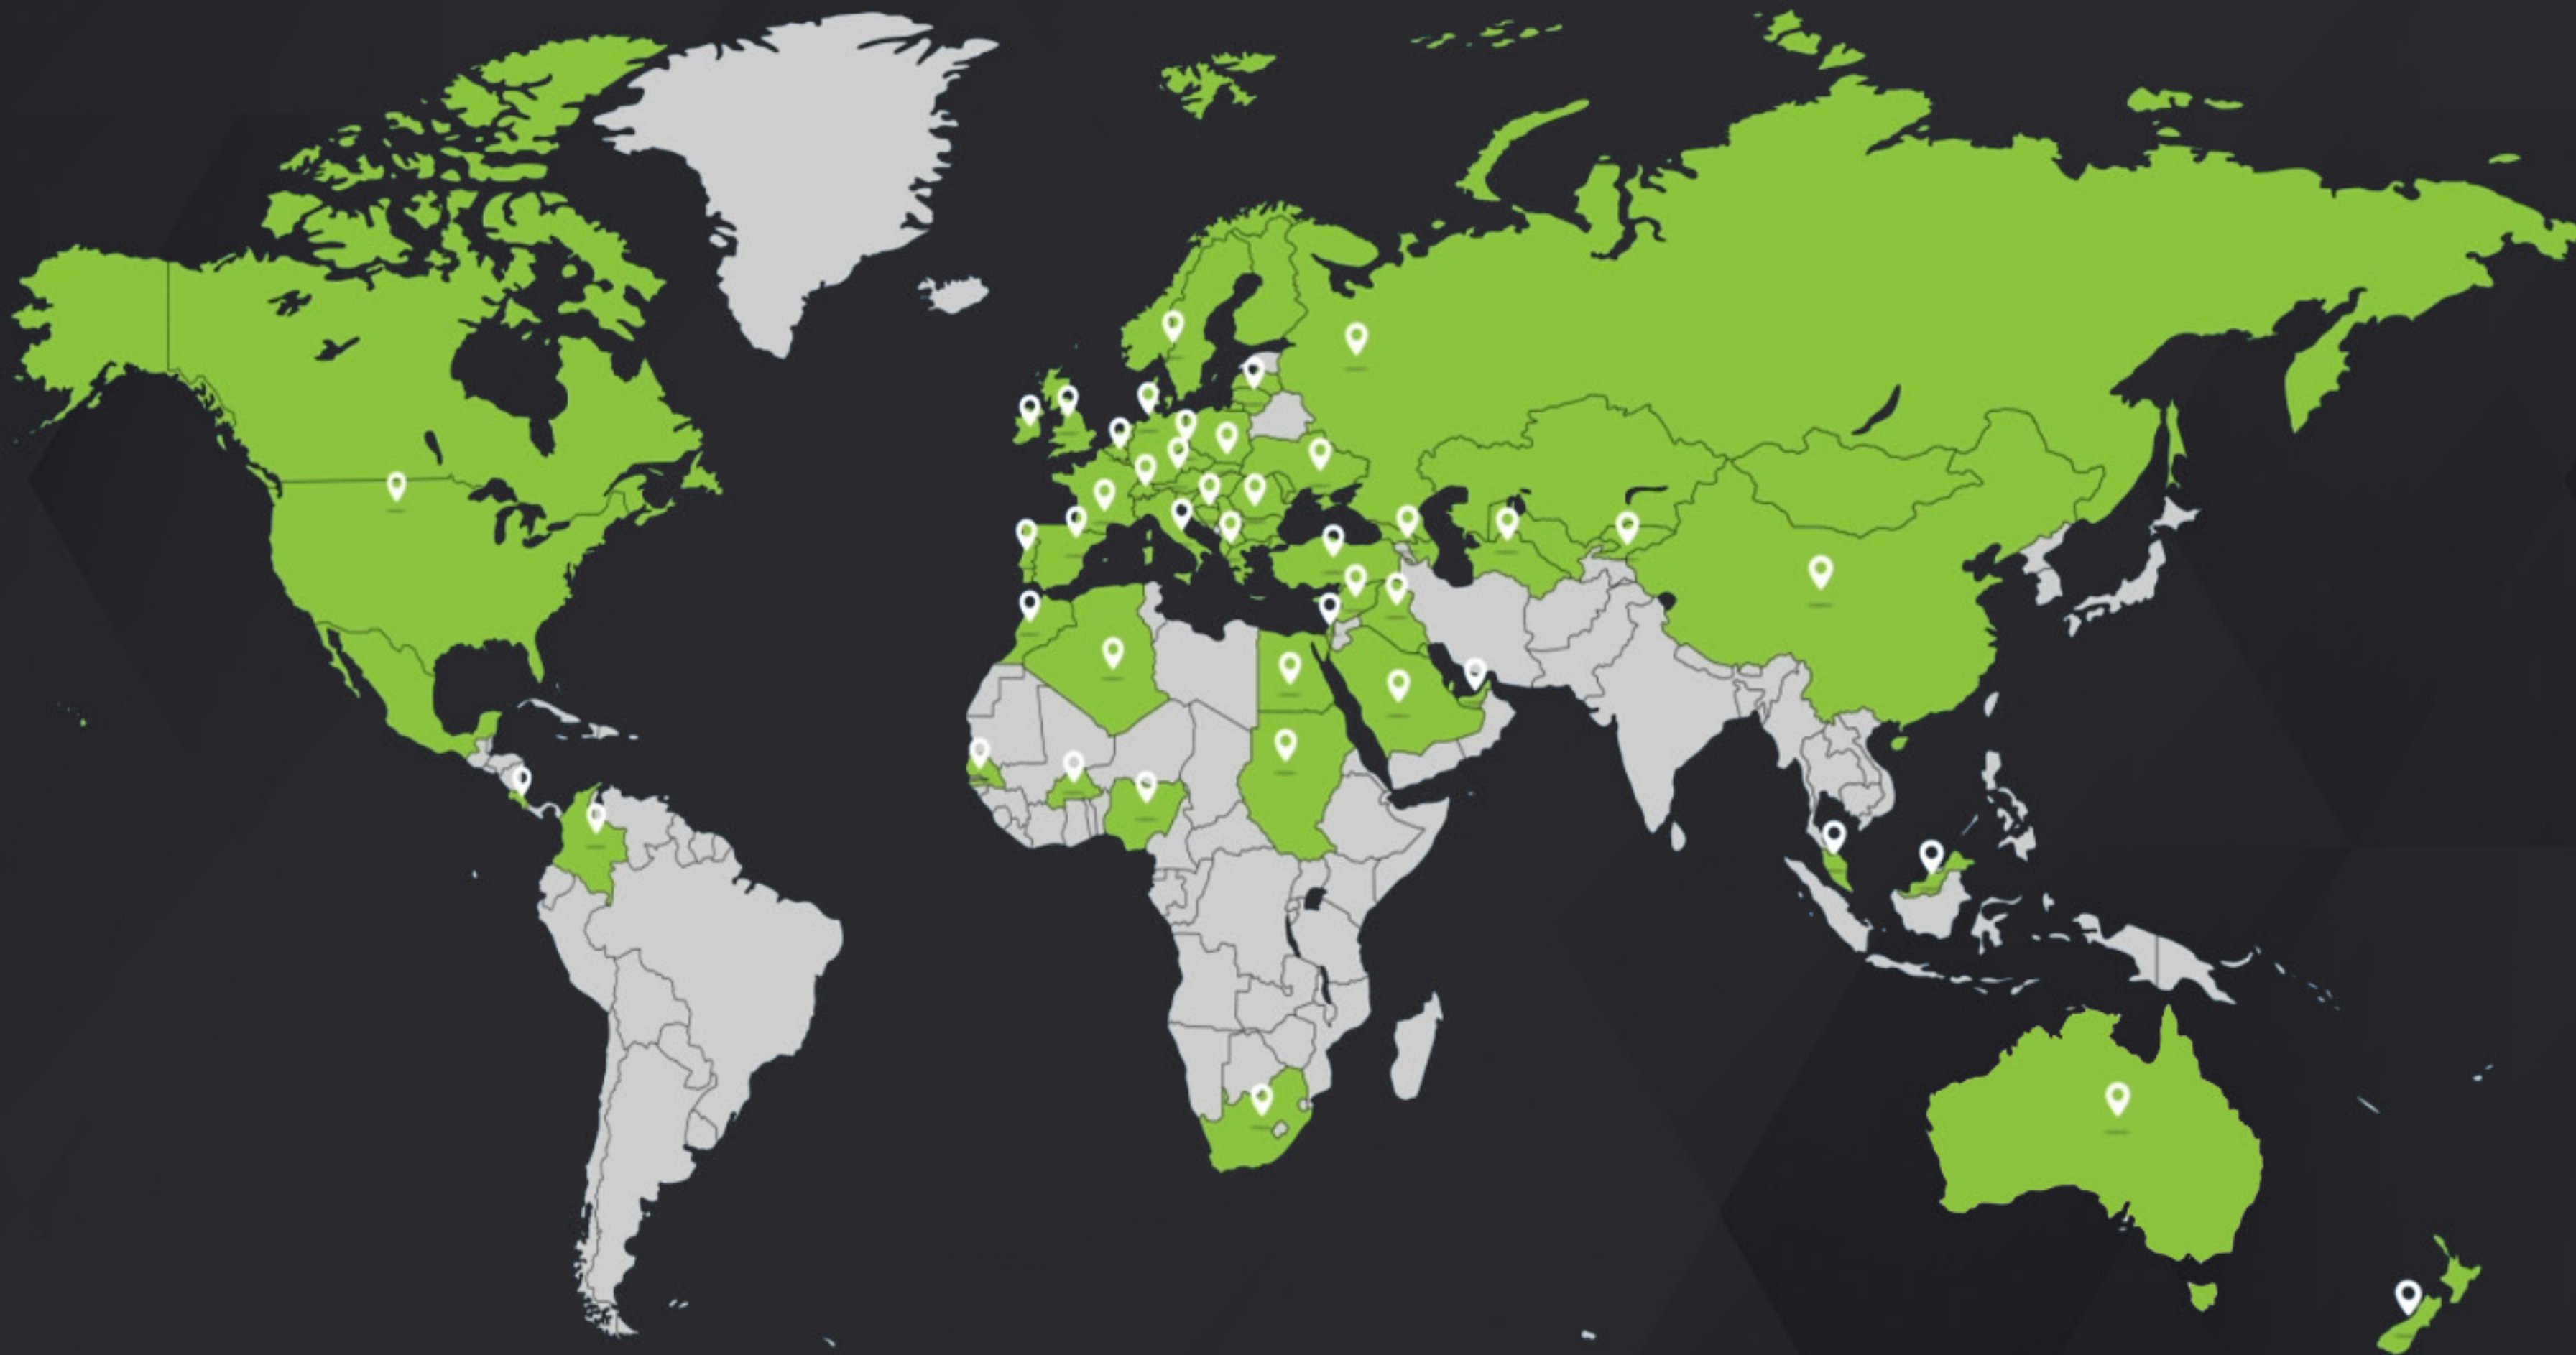

Sanpark was built upon a robust foundation of machinery manufacturing expertise dating back to 1958. Initially focusing on vehicle lifting systems, we expanded our specialization to parking systems in 1998, addressing the growing global demand for innovative solutions.

Today, Sanpark is an integrated technology company with over 300 skilled professionals, 30% of whom are engineers. We manage design, engineering, manufacturing, and after-sales services in-house, delivering tailored, efficient, and secure systems for each project. Our high-tech solutions address urban parking challenges with smart, customer-centric approaches.

# Global Presence Across 5 Continents and 70+ Countries

Our manufacturing capabilities extend beyond Turkey, with exports to over 70 countries across Europe, Asia, the Americas, Africa, and the Middle East. Through our network of partners and distributors, we provide localized technical support and after-sales services.

Sanpark products are renowned for reliability, engineering excellence, and durability, making them the preferred choice for public institutions, hotel chains, shopping centers, and smart city projects worldwide.

# Proud Owner of the World's Largest Parking Systems Manufacturing Facility

In 2024, we launched the first 25,000 m<sup>2</sup> phase of our new factory. The second phase has already begun and will double the facility's size to 50,000 m<sup>2</sup>. This facility stands out not only for its size but also for its advanced manufacturing technologies and eco-friendly infrastructure.

Equipped with Industry 4.0 production lines, robotic welding systems, and dedicated quality control zones, our factory operates entirely on renewable energy, boasting an annual production capacity of thousands of modules.

# Tailored, Safe, and Flexible Parking Solutions

Sanpark offers a diverse range of products designed to meet the varying needs of urban environments and facilities. Our solutions are optimized for user experience, space efficiency, and cost-effectiveness.

## Fully Automated Systems:

High-capacity, software-driven solutions that minimize user errors through maximum automation.

## Semi-Automated Systems:

Flexible solutions ideal for compact spaces, offering both automated and manual controls.

## Mechanical Systems:

Simple yet robust solutions emphasizing reliability and durability.

## Service and Testing Lifts

Reliable lifting solutions for safe and efficient vehicle maintenance, inspection, and quality control.

# Engineering Power Enhanced by Technology

All our products are supported by solutions developed by our in-house engineering and software teams. Advanced simulations, automation software, sensor-assisted parking management, and remote monitoring systems add value to our projects.

For each project, we develop "site-specific" solutions, considering structural conditions, vehicle circulation, user profiles, and cost objectives. Engineering is not just a tool but a core value at the heart of every Sanpark solution.

# Environmentally Responsible Manufacturing for a Sustainable Future

We view sustainable production not as a choice but as a corporate responsibility. Our Teknosab factory operates entirely on renewable energy sources, utilizing systems that reduce water consumption and waste management protocols to minimize environmental impact.

Moreover, our products are designed to deliver maximum performance with minimal energy consumption, offering an eco-friendly approach for end-users as well.

# Projects Brought to Life with Sanpark

Sanpark has successfully completed hundreds of projects across various countries. From residential complexes and hotels to hospitals, municipal parking facilities, business centers, and airports, our diverse portfolio showcases our versatility.

Our systems, implemented in top-tier hotel chains and smart city initiatives, are acclaimed for their design and technological infrastructure, earning user appreciation.

# Comprehensive 360° Service Approach from Pre-Sales to Post-Sales

We approach customer relationships with a lifelong service mindset rather than a sales-focused perspective. Our robust customer satisfaction policy encompasses pre-sales consultations, project engineering, installation support, training services, and 24/7 technical assistance.

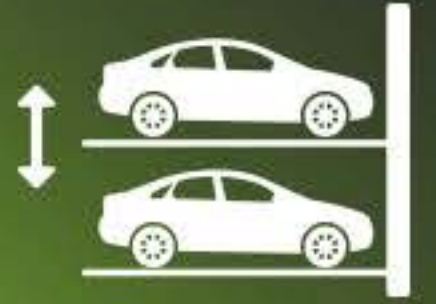

We ensure long-term system reliability through project-specific spare parts inventory, remote fault monitoring, and scheduled maintenance services.

# Mechanical Systems

Increase your parking capacity with compact and efficient solutions.  
Achieve maximum efficiency in every space with our mechanical systems.

Products

**OPTILIFT**

Two-storey mechanical car park system for sedan vehicles

[Detail →](#)

**MAJORLIFT**

Two-storey mechanical parking system for SUV vehicles

[Detail →](#)

**MAJORTRIO**

Three-storey mechanical parking system for sedans and SUVs

[Detail →](#)

**MULTILEVEL**

Three or four-storey mechanical car park system

[Detail →](#)

**IDEALIFT**

Mechanical parking system with pits for independent parking

[Detail →](#)

**IDEALOW**

Mechanical parking system with pits for limited spaces

[Detail →](#)

**SUBLIFT**

Mechanical parking system with pit for outdoor use

[Detail →](#)

**PARK&FLY**

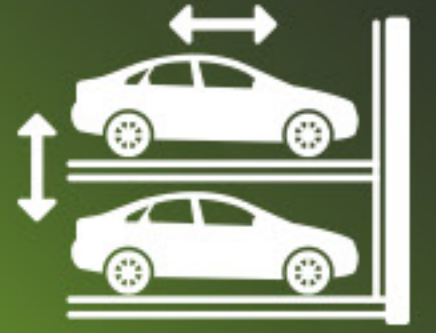

Relieves sky traffic.

[Detail →](#)

# Semi Automatic Systems

The comfortable and secure way to park.  
Semi-automatic systems offer drivers a fast and seamless experience.

Products

**PRACTICAPARK**

Two-storey above ground semi-automatic car park system

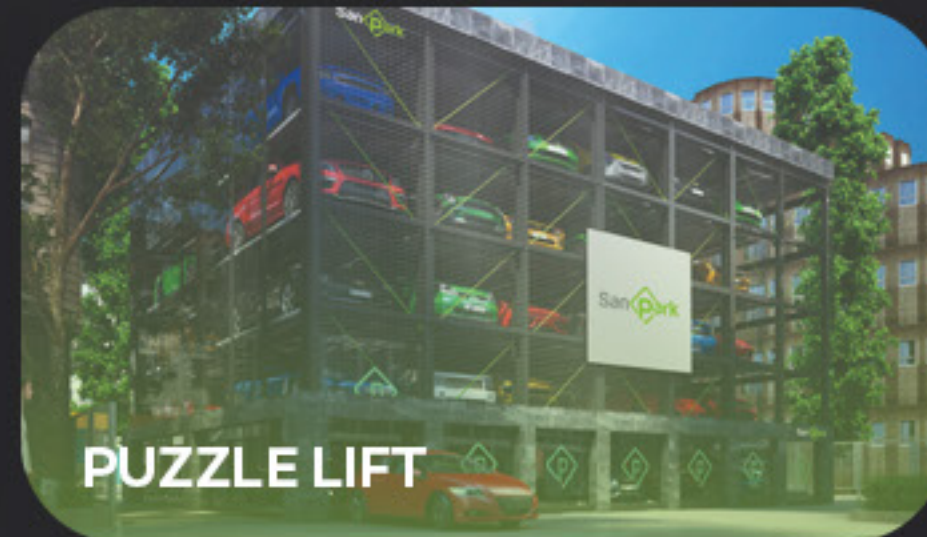

[Detail →](#)

**PRACTICATRIO**

Semi-automatic car park system with three floors on a pit

[Detail →](#)

**PUZZLE LIFT**

Multi-storey above ground semi-automatic car park system

[Detail →](#)

**SLIDER**

Sliding platform

[Detail →](#)

**TURNTABLE**

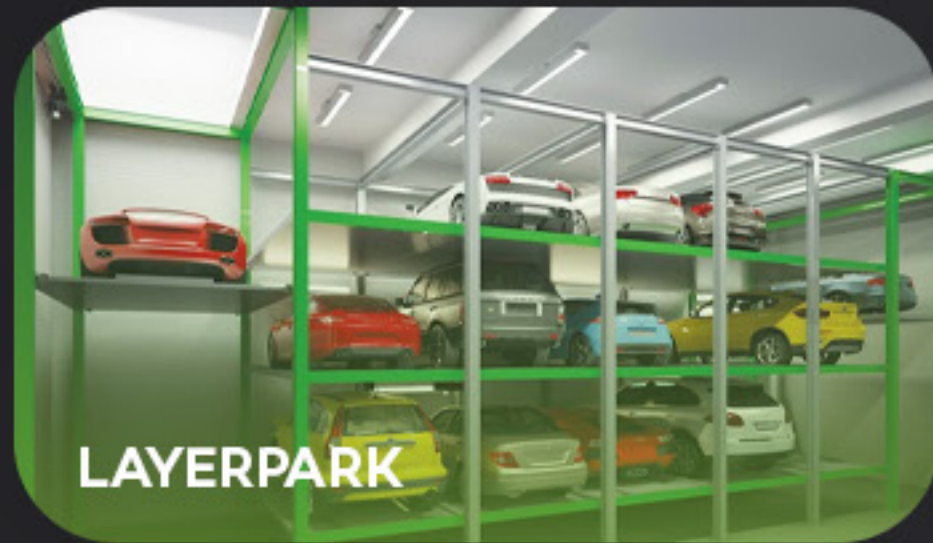

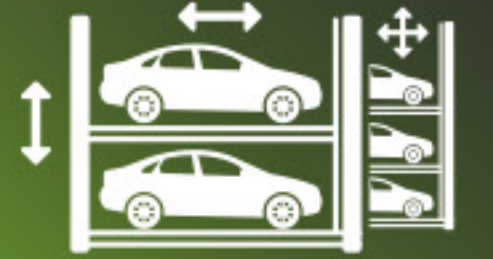

Carousel platform

[Detail →](#)

# Automatic Systems

We are here with fully automated solutions for effortless parking. Automate the parking process while keeping your vehicles safe and secure.

Products

**LAYERPARK**

Automatic parking system for limited underground areas

[Detail →](#)

**SKYPARK SW**

Side by side multi-row automatic parking system

[Detail →](#)

**SKYPARK LW**

Underground multi-row automatic parking system

[Detail →](#)

**PARKCENTER**

Automatic fast parking system

[Detail →](#)

**AXISPARK**

Automatic parking system with maximum vehicle capacity in minimum space

[Detail →](#)

**CAR ELEVATOR**

A safe and powerful solution for your vehicles in vertical transportation. Optimal use even in narrow spaces with high-performance vehicle
